SUMMARY

I'm an **ambitious** Data Scientist who loves solving complex problems by using data-driven approach and effectively presenting gathered insights with the help of interactive data visualizations. I have **over two years of experience in Data Science** gained at LinkedIn, PwC and research company related to University of Warsaw.

EDUCATION

University of Gdansk | Master's Degree 2018 – 2020

Informatics and Econometrics – Big Data Analysis

University of Warsaw | Bachelor's Degree 2015 – 2018

Interdisciplinary Economic-Managerial Studies

WORK EXPERIENCE

Now

PwC

7 months

Data Scientist

Gdansk, Poland

I mainly focus on the development of data analysis application combining different technologies such as D3.js and Flask – it consists of many custom, interactive visualizations created from scratch as well as animations that can be controlled by user.

Nov 2019

Sep 2019

LinkedIn

3 months

Data Science Intern

Dublin, Ireland

I was leveraging unique LinkedIn's datasets to verify the value of networks and job seeking behaviors at the individual and aggregate level, explore the potential to forecast migration flows in the near future and prepare valuable insights for policymakers.

Jul 2019

PwC

11 months

Junior Data Analyst

Gdansk, Poland

I was writing code for various purposes, such as data analysis, data extraction and generation of dummy data. I have also created a process data mining tool with interactive charts and animations that was very well-received both by senior management and PwC's clients.

Aug 2018

DELab UW

12 months

Junior Data Scientist

Warsaw, Poland

I have gained a wide Data Science experience during my work at Digital Economy Lab – I wrote several scrapers of job offers from different websites (Future of Work project), created a couple of web applications and interactive visualizations and comprehensively analyzed various datasets.
